

[Zoom](#)

We sell 20/25 microns film. Bobbin internal diameter is 76 mm. The polypropylene film of different width is used depending on article. From plant it comes in reels of 950-1200 mm width and 240-300 kg weight. Then on cutting machines this film is cut for a desired width for specified article with total accuracy 1 mm (watch the table). Usually bobbins we sell weight 7-12 kg.

All sizes specified in a table below are always available. If roll of a different width is needed we can cut it within 10-15 days after we get money to our bank account. The custom-made film cost is two times higher. Minimum order quantity is two rolls but not less than 20 kg.

Name	B, mm	Roll width	Pcs in 1 kg	Cost price of packing, Euro cents
BD (BluRay) 12 mm (A=171 x 136)	12	190	750	0,853 cents
DVD "Amarey" slim 7 mm (A=191 x 136)	7	204	740	0,864 cents
DVD "DigiPack" slim 7 mm (A=187 x 139)	7	200	740	0,864 cents
DVD "Amarey"/"DigiPack" slim 9 mm (191 x 136)	9	208	710	0,901 cents
DVD "Super Jewel" glass 10 mm (191 x 142)	10	210	660	0,969 cents
DVD "Amarey" 12 mm (191 x 136)	12	210	655	0,977 cents
DVD "Amarey" 15 mm (191 x 136)	15	215	650	0,984 cents
CD slim 5 mm (141 x 124)	5	135	1 090	0,587 cents
CD DigiPack 7 mm (141 x 124)	7	138	1 057	0,605 cents
CD "Jewel" 10 mm (141 x 124)	10	145	980	0,653 cents
Pack of cigarettes (standard) (89 x 54)	22	115	2 300	0,224 cents
Pack of cigarettes (slim) (101 x 55)	12,5	125	2 600	0,198 cents
Soap (80 x 60)	14	102	2 760	0,187 cents
Soap (75 x 50)	20	107	2 740	0,188 cents
Playing cards (90 x 60)	15	115	2 300	0,224 cents
Cosmetics, perfumery (95 x 26)	26	125	2 933	0,176 cents
Cosmetics, perfumery (120 x 100)	100	230	465	1,107 cents
Napkins (120 x 120)	90	240	410	1,258 cents

How to choose a correct film width

In connection with variety of boxes sizes it is hard to compile a full table of recommended film width depending on packed box size.

But you can calculate yourself a needed film width according formula: $S = A + 1.8 \times C$

Also acceptable: $S = A + 1.6 \times C$

It should be noted that depending on machine model (manual, semi-automatic, automatic), technology and technique of packing, peculiarity of user operation on machine, the film width may slightly differ (up to 3 mm) from the width we recommended.

Technical characteristics of the polypropylene film considerably affect the quality of packed item. Automatic machines as a rule are exacting to some parameters such as thickness, friction ratio, tensile strength, thermo shrink etc.). Manual and semiautomatic machines as a rule are not so exacting to the quality of BOPP films.
